Drawings

The drawings are objected to because in Fig. 2 numerals 320 and 321 should be numerals 500 and 501, respectively and in Fig. 4 A, the coupling ledges are numeral 600 not numeral 400 and the glass is numeral 60 not numeral 40. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For claim 1, it is improper to define a feature with respect to a feature that has not been previously positively claimed. For example, in claim 1, the four fastening members are "formed in dimensions according to the flat display panel", the four front side rails are "formed in dimensions according to the flat display panel" and the back board is "formed in desired dimensions to match the dimension of the flat display panel"; however, the flat display panel is not positively being claimed. Also for claim 1, "the two parallel inner frame members" lacks antecedent basis and the phrase "desired dimension" is indefinite/indefinable. Furthermore, it is unclear whether or not the flat display panel is to be claimed in combination with the attachable frame (see for example last line of claim ...are attached to the flat display panel"). Finally, it is improper to follow a closed ended phrase, i.e. consisting of, with an open ended limitation, e.g. at least four inner frame members.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. (The allowable subject matter being the specific attachable frame claimed, i.e. the frame comprising: a main structure having at least four inner frame members with a plurality of apertures and more than four fastening members; a bracing structure having at least one bracing member which has two ends fastening to two parallel inner frame members to provide

bracing and support; a front frame having at least four front side rails and more than four fastening holes to match the fastening members of the main structure for fastening the front side rails to the main structure; and a rear frame having at least four rear frame boards and a back board being fastened to the main structure and the bracing structure thereby the main structure, the bracing structure, the front frame and the rear frame are attachable to a flat display panel.

Claims 2-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
